

RECOVERY MOVIE MEETUPS™

The **Recovery Movie Meetups™** Program is an easy plug-and-play mutual support meeting format where your treatment facility screens a curated series of popular films about addiction and recovery in group sessions, and then invites participants to engage in dynamic and highly interactive discussion afterwards - guided by the **Recovery Movie Meet-Ups Workbook**.

Each Workbook features film summaries on 20 key addiction & recovery-related films, movie trivia, character breakdowns, evaluation of each film's impact and relevance, and Motivational Interviewing-based questionnaires that participants can fill out during or after the screening to then share and discuss in subsequent meetings.

The meeting format works just as well in IP and IOP contexts, and is not intended to replace any group meeting modalities you currently have in place. It's just an innovative, clinically-validated (see **Advisory Committee** below) compliment to your existing continuum of care programming that will get your participants engaged, sharing, and thinking.

There are no start-up fees, and no professional certifications are required. Free training is offered (2 hours online).

Recovery Movie Meetups are customizable for any size groups, and only require a meeting host/facilitator, a common area with a TV, and the **Recovery Movie Meet-Ups Workbook** (pictured) that we ship to you either pre-printed or in **PDF format** for you to print yourself on-site.

Workbook exercises help guide structured discussions at the meetings, and are the most powerful part of the program. Participants come to view fully completed Workbook exercises as an achievement in their recovery.
